Reduce recurring costs from third-party solutions

We develop custom solutions for you with **Power platform**

Custom app development using power apps

- We build internal applications.
- Reduce subscriptions to 3rd party apps.

Business process automation with power automate

- Automating repetitive business processes
- Automate approvals by integrating your CRM and accounting software.

Advanced analytics and reporting with power bi

- Real-time insights into your business performance.
- View all your critical metrics in one place.

Use Cases

Custom App Development : Employee onboarding, or inventory management without relying on expensive third-party solutions.

Automated Approvals : Automate approval workflows for purchase orders, leave requests, or expense claims, reducing delays and manual interventions.

Realtime Reporting : Leverage Power BI to create dynamic dashboards that track key performance metrics like sales, project timelines, or financial data, giving you actionable insights at a glance.

Data Synchronization : Integrate and automate data flows between systems, such as syncing CRM data with your ERP system, ensuring your information is always up to date.

FlyWheel Infotech was founded by seasoned professionals with extensive experience in product development and resource management, serving clients across diverse industries.

Our team includes highly skilled experts in web and mobile technologies, along with an in-house team specializing in Power Platform development.
